

Guided Drug List

Medication Alternatives

The Guided Drug List is a list of prescription medications approved by the U.S. Food and Drug Administration (FDA). We've reviewed these drugs through our Pharmacy and Therapeutics (P&T) Process, which considers a drug's:

- Effectiveness
- Safety
- Similarity to other drugs within a therapeutic class
- Affordability

The Guided Drug List is an open drug list or formulary, with some closed drug classes. The list includes a broad range of drug choices.* If a medication is not on the list, there are other high-quality, cost-effective choices, called preferred alternatives, that are.

Medications not included on the Guided Drug List are shown on the chart included here, along with their preferred alternatives that are on the list. Please note, exclusions and limitations may apply. For details about

what's covered and what's not, it's best to check the Certificate/Evidence of Coverage or Summary Plan Description.

To view and search the complete Guided Drug List, members should log in at ingenio-rx.com and choose Drug lists and pharmacy tools. Information on dosage/strength options and any restrictions such as quantity limits, prior authorization or step therapy requirements is available.

Members can also call Pharmacy Member Services at the number on their ID card or visit ingenio-rx.com.

What if a medication isn't on the Guided Drug List?

There may be times when your drug isn't on the Guided Drug List.

You can talk to your doctor or pharmacist to see if there's another covered drug that will work just as well, or if generic or OTC drugs are an option. Only you and your physician can decide what drugs are right for you.

For the most up-to-date information, members should log in at ingenio-rx.com and choose **Drug lists and pharmacy tools**.
